SS-4290: Computer Science Final Year Project Weekly Report

Week 1 (Due 11th August 2021)

Muhammad Syauqi Waiz bin Haji Sufri

17B9082

Objectives:

1. Read Research Paper ☒
2. Create GitHub ☒

1. Read Research Paper

Firstly, began by going to the links given by supervisor. Read, watch videos and make notes on Episodic Memory. Understand the concepts, the definition of Episodic Memory and the parts of the brain involve in the process which includes the real-life examples.

The videos are mainly from YouTube while some materials are found by searching and going to relevant websites. The videos on YouTube shows the example visually so it's easier to understand.

Next, read on how to read a research paper and gain helpful tips on how to do so. One of the ways is to read and understand the Abstract of the research paper, skim through the introduction, read and analyze about the findings and diagrams and finally read the conclusion.

Currently, reading the research paper.

2. Create GitHub

Created a repository named 'episodic-memory' and stored all reading and relevant materials inside it. The link to the repository will be shared to the supervisor.
